

UNIV/HNRS-391/492 Final Exam one hour Name _____

Two pages of writing – less than 1000 words please, and please make it legible for me.
Thanks!

In order to receive credit, please answer the question (that is don't change the question), and draw from information in the class discussions, readings, assignments, interventions.

1. How has this class changed your model of what development is, and please identify how any of the class material (readings, discussions, activities, lectures) affect this change? Please don't say you didn't have a model before the class. You may have just not identified the model.
2. We had several speakers: Bhoj Rai (US Peace Corps Recruiter), Daniel Weins of Journeyman International, Jim Keese (improved stoves in Peru), Peter Teller (AID Africa), Roger Burton (former international business consultant). Pick one of these speakers and describe their development model, and using information from the class, describe why this development model works well or doesn't, or why you agree or don't agree.
3. Why is development so damn hard? Why has the world been working on it since the end of WW II with dubious results, or that completing our projects was way more difficult than we anticipated?
4. How did this class change your view of our place in the world and our everyday lives?
5. Give an example of a development project, or technology that you find to be successful in helping people. State why it was successful. Start below and add more pages as needed.
