					N =	(5)	(4)	(3)	(2)	(1)
2.1)	Overall, this instructor was educationally effective.	4.43	5	1.13	7	5	1	0	1	0
2.2)	Overall, this course was educationally effective.	4.57	5	1.13	7	6	0	0	1	0

**COMMENTS**

1.1) Write any comments below that might help your instructor evaluate his/her teaching performance. What did you particularly like? What improvements could you suggest?

- Great class! So great to make use of the technical workshop, I never would have done that had I not taken the class! Also so cool to get to hear from such a variety of people working on cool projects on campus!

- Stated before in the previous lecture evaluation.

- I personally liked the loose structure of the course.

- I liked that Pete really pushed us to make the most out of this class. There were times when I felt uncomfortable with the lack of structure, but I learned that this was a new way of learning and working through these new challenges. There were times when I didn't understand his point of view towards certain issues, but he created a classroom environment where it was ok to discuss these points. Overall, Pete was a great professor who taught me how to think differently and I will continue to take this with me after this class.

- I though Schwartz was perfect for the class. He isn't traditional and I enjoyed his discussions. I think appropriate technology is changing and and he does a great way of teaching us about it. He is accepting of all opinions, or at least he tries his best, and he is supportive, which is a good trait for a class that is project based--and that the projects can be frustrating if you aren't getting the results you want. In my opinion, I thought he spent more time with groups with projects he was more interested in which is something he can work on. I also think more structure would be nice, like more deadlines, but I also think the current structure matches the class.

- I really liked, and appreciated, how Pete involved every student in class discussions and made the classroom environment very inviting, relaxing, and like you were a part of something important.  
An improvement could be more direction/guidelines for how the course structure should go.
